

DSI Domain Knowledge and Business Focus

eBusiness Solution

Why eBusiness

"The newest innovations, which we label information technologies, have begun to alter the manner in which we do business and create value, often in ways not readily foreseeable even five years ago." Alan Greenspan, Chairman, US Federal Reserve, July 2000.

"As we see it, enterprise technologies need to do far more than serve up the essential 'abilities' - availability, reliability, scalability, and manageability; they also need to provide businesses with the agility to understand, anticipate, and respond to changing customer needs." Steve Ballmer, Microsoft Corporation.

Background

By leveraging the Internet as a tool not a solution, DSI enables companies to enhance their business operation and processing with greater efficiency, agility, and success. DSI Internet Business Solutions improve our customers' competitive advantages by providing enterprise critical features such as managing customer relations, bringing staff closer to customers and vendors, and improving business flow.

Solution Highlights:

DSI's eBusiness Solutions provide a scalable and reliable eBusiness framework for companies interested in modernizing their core business by leveraging the power of the Internet. Our solutions address: Internet (B2C), Intranet (B2E), and Extranet (B2B). They also cover the Enterprise Information Portal (EIP), Personalization, Enterprise Content Management (ECM), Collaboration, Workflow Management, eCommerce, and Enterprise Application Integration (EAI).

Business Benefits:

DSI can help you achieve success for your company with solutions designed for Internet business. With Internet business solutions, you can:

- Build and foster relationships through more effective online solutions that are rich in content, and provide personalized browsing.
- Increase revenue by marketing and selling directly to customers and partners.
- Get to market fast with eBusiness solutions that can be built and deployed in record time.
- Increase knowledge worker productivity by empowering business users to manage their online content, promotional campaigns, and product catalogs.
- Reduce costs and simplify deployment through optimizing the integration of business systems, and the global reach of online services.

Internet Solutions DSI Offers:

DSI takes advantage of the best-of-breed approach that enables you to build the most comprehensive solutions.

We offer solutions that enable enterprises to operate in a world where time and distance no longer separate employees from customers, partners, or operations. We build eBusiness solutions that seamlessly connect between back-end data and front-end systems and create a flexible information infrastructure that works as either a loosely coupled distributed system or tightly integrated whole.
